A. LEGAL AUTHORITY

Each county jail is required under Correction Law, Section 500(f) to maintain a daily record of all inmate admissions and discharges. Specifically, Section 500(f) requires that:

> "Each keeper shall keep a daily record, to be provided at the expense of the county, of the commitments and discharges of all prisoners delivered to his charge, which shall contain the date of entrance, name, offense, term of sentence, fine, age, sex, place of birth, color, social relations, education, secular and religious, for what and by whom committed, how and when discharged, trade or occupation, whether so employed when arrested, (and) number of convictions."

Pursuant to Title 9 of the Codes, Rules, and Regulations of the State of New York, Section 7000.1(d), each county sheriff, superintendent, commissioner or officer in charge of a county jail or county penitentiary shall submit a statistical report containing data with respect to prisoners received and discharged during the preceding calendar year. Forms on which such data will be reported are forwarded by the Commission at the end of each year.

The Commission of Correction records and combines these individual county reports to produce an annual compilation of data from all jails and penitentiaries.

B. BACKGROUND - STANDARDIZED ANNUAL REPORT

On a daily basis, each county correctional facility in New York State records information on inmate admissions. County correctional facilities house pre-trial (unsentenced) individuals as well as inmates who have been sentenced up to one year. All facilities are "adult" correctional facilities in that they house individuals age 16 or older. It is from these daily records that an annual report is compiled by each facility and submitted to the Commission of Correction.

Effective January 1, 1989, the daily recording of inmate admissions was standardized on a statewide basis.

Across the 57 counties outside the City of New York, there existed many different procedures for the maintenance of admission records. It therefore, became almost impossible to compare one county to another even if they were of similar size because of different internal procedures. On the county level, some counties were recording duplicative inmate admissions on the same individuals. Several common practices included discharging and readmitting an inmate each time he or she went to court; recording an intermittent admission each time he or she served a weekend sentence; and recording multiple offenses committed by one individual as multiple inmate admissions.

The purpose for developing statewide standardized procedures for recording inmate admissions is to eliminate inconsistent reporting among county correctional facilities. A Guidelines Manual was written to provide clear definitions for the consistent recording and reporting of inmate data from all counties. The definitions of basic correction terms were agreed upon through the cooperative efforts of Commission staff and members of the Jails Team. The Jails Team (formally known as the Local Correctional Facilities Functional Team) is comprised of county correctional personnel involved with the day-to-day operations of their jails. The Jails Team falls under the sponsorship of the Local Correctional Facility Executive Sponsor Committee of the New York State Sheriffs' Association. Their assistance and expertise have been invaluable in developing workable procedures for both county and state governments.

We have made significant progress with many counties who have made major changes to their procedures. Others still have work that needs to be done. We will continue to work with all counties so that New York State provides the most reliable jail data that can be provided to our legislators, our citizens and the criminal justice community.

C. EXPLANATION OF DATA TABLES

1. Table 1 - County Admissions Received From Courts Within Their County

A County Admission is defined as: county inmates committed or remanded to the custody of a county sheriff or corrections department by any of the courts within that county.

Inmates remanded on an unsentenced offense are recorded as an unsentenced admission. One admission is recorded per inmate even if he or she is committed on multiple offenses. Initial Entry Sentenced inmates are recorded as an admission. These are sentenced inmates who were not in the jail's custody prior to sentencing. For instance, an individual who is on bail and subsequently sentenced to the jail is recorded as an Initial Entry Sentenced inmate. The total number of county admissions reflect unsentenced inmates and initial entry sentenced inmates.

2. Table 2 - Midnight December 31, 1989 Inmate Count as Reported Via the Jails Daily Population System

On a daily basis, each county jail reports their inmate population count on-line via the Jails Daily Population Reporting System. The population counts are transmitted via NYSPIN (New York State Police Information Network) terminals. The inmate counts reflect the physical body count of inmates in custody. It does not include any inmates

housed out by the facility at the stroke of midnight 12/31/89. At the same token, for those facilities who house in inmates from other jails, housed in inmates are reflected in the count of the jail who has the "body."

3. **Table 3 - Average Daily Count and Capacity**

The Average Daily Count was computed from daily population reports transmitted by each county jail and penitentiary from 1/1/89-12/31/89. The count reflects the physical body count of inmates in a facility at midnight of each day throughout the year. The Total Count Average is the sum of the Male Count Average and the Female Count Average.

Note: Fulton County Jail is closed.

The Design Capacity is the total number of cells and multiple occupancy housing units which meet Minimum Standard requirements for space allocation and equipment. The Minimum Standards for Local Correctional Facilities are codified in Title 9, Part 7000 et seq. of the Codes, Rules, and Regulations of the State of New York. The design capacity formulation is based on the following criteria:

Individual Occupancy Housing Units:

1. Each unit shall only house one inmate and contain at least 60 square feet of floor space.

2. Each unit shall contain: one bed and mattress; one functioning toilet; and, one functioning sink.

3. At least one functioning shower shall be available for each tier/section of such units.

The following are allowable exceptions: 1) A unit may contain less than 60 square feet of floor space if such unit was originally constructed for single occupancy or rated for single occupancy by the Commission of Correction; 2) Each unit used to house inmates apart from general population for the purpose of medical observation or treatment shall have a minimum of 80 square feet of floor space; or 3) Required equipment (bed, mattress, toilet, sink) may be modified or excluded for units used for short term medical/mental health observation of inmates when the presence of such equipment may pose a threat to these inmates or to the safety or security of the facility.

Multiple Occupancy Housing Units:

1. Each unit shall provide a minimum of 50 square feet of floor space per inmate in the sleeping area.

2. Each unit shall house no more than 60 inmates.

3. Each unit shall have a bed and mattress for each inmate.

4. Each unit shall have at least: one functioning toilet for every eight inmates; one functioning shower for every eight inmates; and, one functioning sink for every eight inmates.

5. Each unit shall provide dayroom space immediately adjacent and accessible to the sleeping area.

Total Capacity (Design Capacity plus Variance Capacity) is the total number of approved cells and multiple occupancy housing units. Variance Capacity includes any temporary housing space or formal variance space designation as approved by the New York State Commission of Correction.

4. **Table 4 - Average Daily Census**

The Average Daily Census is computed from the daily population counts transmitted by each jail and penitentiary during the calendar year 1989. The Census reflects the number of inmates for which the county of origin is responsible (no matter where these inmates are physically being housed). The Average Daily Census is computed by taking the physical body count of a facility and adding to it any inmates who are boarded out to another county, housed out to a mental health or medical hospital, or housed out for some other reason. Any inmates who are boarded in from another county are subtracted from the body count.

For instance, Fulton County Jail was closed during 1989. While their Average Daily Count is 0 for the year, their Average Daily Census is 48. In other words, Fulton County was the county of origin or the census county for an average of 48 inmates during 1989.

5. **Table 5 - Sentenced Inmates Committed from Courts Within Their County**

There are two processes whereby an inmate is committed as a sentenced inmate. One, by Initial Entry sentence (not in jail custody prior to sentence); and two, by Change of Status sentence. A Change of Status sentence is an inmate who is being housed in the jail as an unsentenced admission and is subsequently sentenced to the jail. The inmate is not recorded as a new admission but is recorded as a Change of Status sentence.

In other words, the sentence is recorded but is not counted as a new admission. Therefore, the number of sentenced inmates committed, which is the total number of all inmate sentences, will be greater than the actual number of county sentenced admissions (Initial Entry).

Inmates sentenced to time served are recorded as Change of Status sentences.

6. **Table 6 - County, Housed In and Total Admissions/Discharges**

The number of county admissions (unsentenced and initial entry sentenced) are repeated. The number of people Housed In for Other Jurisdictions are reported here and include inmates boarded in from another county jail, state parole violators (who are incarcerated in a county jail solely on a parole violator warrant and have no other county charges pending), federal inmates, and transient inmates held for another state or country.

Total Admissions represent the total number of inmates received by the county jail, both from courts within the county (county admissions) and those incarcerated for another jurisdiction ("non-county," meaning another county, state or federal jurisdiction).

Discharges are recorded in the same manner. County discharges reflect all discharges of a particular county's inmates. Other Than County Inmate Discharges reflect the discharge of inmates who have been housed in for a different county, the state or federal jurisdictions.

7. **Table 7 - Inmates Admitted as Housed In For Other Jurisdictions**

This table reflects in more detail the types of inmates housed in by the reporting counties; namely, Other County Inmates, State Inmates, Federal Inmates, and any inmate housed in for some Other reason such as for a state outside of New York or another country.

8. **Table 8 - Inmates Temporarily "Housed Out" to Another Jurisdiction**

Inmates housed out during the year are reflected in this table. These are inmates who have been boarded out to other counties, admitted to Mental Health Facilities, admitted to a medical hospital, or housed out for some Other reason.

9. **Table 9 - Unsentenced County Admissions by Reason for Commitment**

Unsentenced county admissions reflect only county inmates committed from courts within that county (this eliminates any double counting of unsentenced admissions who are subsequently housed out to another county.) The county of origin is the only county that records the unsentenced reason for commitment.

The one most serious offense at the time of admission is the offense reported by Reason for Commitment.

The offenses are categorized as Felonies, Misdemeanors, or Other Offenses. "Other Offenses" include Violations, Infractions, Violation of Probation, or Civil offenses.

10. **Table 10 - Sentenced County Inmates By Reason for Commitment**

Sentenced County Admissions by Reason for Commitment includes both Initial Entry sentences and Change of Status sentences. The most serious sentenced offense is recorded for those sentences that are to run concurrently. The county of origin is the only county that records the sentenced reason for commitment.

Sentenced offenses are categorized as Felonies, Misdemeanors, and Other Offenses. "Other" sentenced offenses include Violations, Infractions, Youthful Offenders, and Civil offenses.

11. **Table 11 - Unsentenced County Inmates - Felonies**

This table represents a more specific breakdown of the felony class for unsentenced county admissions. Felonies are in order from the most serious felony class to the least. (Class AI, AII, B, C, D, and E felonies).

12. **Table 12 - Unsentenced County Inmates - Misdemeanors**

This table represents a more specific breakdown of the misdemeanor class for unsentenced county admissions. Misdemeanors are listed as Class A, B and U.

13. **Table 13 - Unsentenced County Inmates - All Other Offenses**

This table represents a more specific breakdown of unsentenced offenses Other than a felony or misdemeanor. Reported here are Violations, Infractions, Violation of Probation and Civil offenses.

14. **Table 14 - Sentenced County Inmates - Felonies**

Sentenced felony inmates include both Initial Entry and Change of Status sentences. Definite sentences (up to one year in a county jail) can be served for certain C drug felonies only; and for D or E felonies.

15. **Table 15 - Sentenced County Inmates - Misdemeanors**

Inmates sentenced on misdemeanor offenses include both Initial Entry and Change of Status sentences. Sentences include Class A, B, or U misdemeanors.

16. **Table 16 - Sentenced County Inmates-All Other Offenses**

This table represents any Initial Entry or Change of Status sentences committed to the jail on other than felony or misdemeanor offenses. Sentences include Violations, Infractions, Youthful Offender and Civil.

17. **Table 17 - Length of Sentence in Days - County Inmates**

Length of Sentence includes both Initial Entry and Change of Status sentences. The Length of Sentence is the total number of days imposed by the court at the time of sentence to a county facility.

This table does not reflect the actual number of days a sentenced inmate was incarcerated. For example, someone sentenced to 30 days and entering a county facility as an Initial Entry sentence reports Length of Sentence as 30 days. The inmate's length of stay as a sentenced inmate actually could be 20 days (with one-third off for good behavior.)

Inmates who are sentenced to time served are included in this table.

18. **Table 18 - Length of Stay for County Discharges In Days**

The actual Length of Stay is reported for every county inmate upon his/her discharge from custody. The Length of Stay is calculated from the date of admission to date of discharge. This would include any inmates who were admitted in 1988 but not discharged until 1989. One length of stay is reported for Change of Status sentenced inmates -- from date of unsentenced admission to date of discharge by expiration of sentence.

Length of Stay is reported in days and in hours for those inmates who are in custody for less than one day. Parts of a day include: 1/4th of a day (0-6 hours); 1/2 of a day (6-12 hours); 3/4th of a day (12-24 hours). Anyone remanded more than 24 hours would be reported in the 1-3 day category.

19. **Table 19 - County Admissions Age When Admitted**

This table includes Initial Entry sentenced admissions and all Unsentenced county admissions by age of the inmate at the time of admission.

20. **Table 20 - County Admissions by Years of Education Completed**

This table includes Initial Entry sentenced admissions and Unsentenced county admissions. Education is reported by the highest grade completed. For instance, if an inmate dropped out of high school in his/her 12th year and did not graduate, the highest grade completed is reported as 11th grade.

21. **Table 21 - County Admissions Able to Read and Write**

This table includes Initial Entry sentenced admissions and Unsentenced county admissions. Literacy is recorded as a yes or a no.

An inmate needs to be able to both read and write in order to be reported as "yes". A county inmate is reported as "no" if: 1) the inmate cannot read or write; 2) if they can read but not write; or 3) if they can write but not read.

Two facilities, namely, Westchester County Jail and Westchester County Correctional Facility did not collect nor report inmate literacy data. The statewide totals for this table are, therefore, minus Westchester Jail and Correctional Facility admissions.

22. **Table 22 - County Admissions by Race**

This table includes Initial Entry sentenced admissions and Unsentenced county admissions. Race categories include: White, Black, American Indian, Asian and Other.

23. **Table 23 - County Admissions by Ethnic Origin**

County Admissions by Ethnic Origin include Initial Entry Sentenced admissions and Unsentenced admissions. Ethnicity was collected and reported for every inmate. Ethnic Origin is simply reported as Hispanic or Non-Hispanic.
